A. PROGRAM DESCRIPTION
The U.S. Embassy Niamey Public Diplomacy Section of the U.S. Department of State is pleased to announce an open competition for organizations to submit applications to carry out training for community radio technicians in Niger. This program aimed at reinforcing capacity and skills of community radio in the era of new technology in broadcasting rooms and studios.

Background:
The first ever community radio in Niger was created in 1999 in Bankilaré. Community radios play a significant role in informing people, especially those living in rural areas. The aim was to enable the local community to grasp the current issues of precariousness, water, electricity, agriculture, and livestock. As of 2022, 202 community radio stations are accredited but only 180 are fully functional due to the lack of resources. Funding for Community radio stations is limited and they often struggle to sustain themselves while simultaneously providing support and maintenance to their equipment often keeping it functional in harsh environments. Most community radio technicians have not received any formal or professional training and have learned how to use and maintain the technology on their own.

Priority Regions: Community Radio stations from all eight regions of Niger should be included. Training locations should include the cities of: Niamey, Maradi, Zinder, and Agadez. Some programming must take place at the American Spaces in each of these regions.

Participants and Audiences:
Each location listed will have at least 10 participants. Participants in the training programs should be Nigeriens aged 14-45 years old. They include:
- Community Radios Technicians.
- Focal point for community radio in charge of maintenance.

Program Objectives 1:
The training should be hands on with participants being given time to practice. Proposals for projects must focus on the following the priorities:

- Understanding the broadcast room, studio, and production equipment
- Setting-up equipment for better results
- Getting ready for digital migration
- Pre-maintenance, maintenance, and repair, especially in austere environments with harsh conditions
- How to develop content to promote American English language learning, and/or good governance, and/or responsible citizenship such as through community service.

B. FEDERAL AWARD INFORMATION

Length of performance period: Up to 12 months
Number of awards anticipated: The preference is for one (1) award which covers all locations, but smaller, location-specific awards will be considered if no qualified proposals covering all locations are submitted.
Programs start date: Program must begin by September 2022.

This notice is subject to availability of funding.

Funding Instrument Type: Grant.

Program Performance Period: Proposed programs should be completed in 12 months or less. U.S. Embassy will entertain applications for continuation grants funded under these awards beyond the initial budget period on a non-competitive basis subject to availability of funds, satisfactory progress of the program, and a determination that continued funding would be in the best interest of the U.S. Department of State.
